## **Horse Days 2011 – Dave Kluge Presentations**

(There is no charge for these presentations.)

### **Friday – August 19**

#### **8:00–10:00 Livestock Show Barn – Teaching Lateral Movement**

Understanding the application of the leading rein, indirect rein and direct rein, as well as seat and leg aids to teach the horse lateral movement.

#### **2:00-4:00 Livestock Show Barn – Teaching Softness & Self-Carriage**

By understanding the bio-mechanics of movement and how it effects the thinking of the horse we can teach the horse softness and self-carriage without mechanical gimmicks like: draw reins, standing, running or German martingales, chambons, leverage bits, etc., etc.

### **Saturday – August 20**

#### **8:00–10:00 Livestock Show Barn – Introduction To Driving**

If you've ever thought about driving your horse you need to consider what you and your horse need to know for driving in today's environment. How to select a vehicle to meet your intended use and match harness and horse to the vehicle.

#### **3:00–5:00 Sheep Barn – Preparing The Horse (And Rider) For Roping**

It's long been said: "The most dangerous tool on the ranch is a lariat." This presentation is how to prepare both horse and rider to handle that tool safely and effectively.

### **Sunday - August 21**

#### **9:00-11:00 – Livestock Show Barn – Teaching Softness & Self-Carriage**

By understanding the bio-mechanics of movement and how it effects the thinking of the horse we can teach the horse softness and self-carriage without mechanical gimmicks like: draw reins, standing, running or German martingales, chambons, leverage bits, etc., etc.
